Hello
I'm Zachary Gerhart

(520) - 609 - 8908 || zgerhart@gmail.com || /in/zach-gerhart || github.com/zachgerhart || zachgerhart.com

Skills

Javascript || React || React-Redux || Node.js || Express || SQL || Html5 || Css3 || Git

Projects

Sportify || Personally Developed Full Stack Web App

A fantasy sports application where users can save a player and check stats. Visit live site: [Sportify](#)

- A full stack project using the sportradar API. Built using React, React-Redux, SQL, Express, and Node.
- Wrote endpoints to interact with the API as well as the SQL database.
- Implemented conditional rendering to display player stats based on the selected sport by using React.

Wayz || Team Developed Full Stack Web App

A travel-app where users can search flights based on popularity or budget. Visit live site: [flywithwayz.com](#)

- A full stack project using the skyscanner API. Built using React, React-Redux, SQL, Express, Node.
- Implemented Auth0 to save a user to the database allowing them access to the site.
- Used bootstrap and other styling methods to create an awesome user experience for desktop and mobile.
- Worked on a team of 5, utilizing best practices such as Github merging, paired programming, and daily stand ups.

Experience

August 2012 - June 2017
Government Contractor, Tucson AZ – *Carpenter*

- Currently hold a government secret clearance, as well as a hazardous materials (Haz-Mat) certification.
- Followed a strict blueprint to pack and ship aircraft parts for the US Air Force while working independently.
- Assigned to special projects with other team members, including constructing parts weighing 10,000 lbs.

Education

August 2017 - January 2018
DevMountain, Dallas TX – *Web Development*

Completed the Full Time Web Dev Immersive course || [devmountain.com](#)

August 2011 - January 2012
Pima Community College, Tucson AZ – *General Education*
